

NETWORK webinar on U.S. federal policy

Rose Marie Tresp, RSM; Institute Justice Team

[This resource from NETWORK](#) covers in one succinct webinar many of the executive actions and pending legislation which will affect the most vulnerable persons in the United States. These issues include budget reconciliation, tax policy, detentions and deportations, SNAP, Medicaid, and healthcare. This overview uses slides to illustrate the information presented by the speakers. The outcome of the decisions on these issues in the coming year could increase poverty and inequality, destroy safety net programs, impair access to housing, education, and health care, and gut clean energy programs.
